SUMMARY

Full Stack Engineer with 3+ years of professional experience building high-performance SaaS products, MERN stack applications, and cloud-native backend systems. Proficient in React.js, Node.js, Express.js, MongoDB, Java, Spring Boot, and AWS, with hands-on DevOps experience across Docker and CI/CD pipelines. Experienced in AI-assisted automation and LLM integration. Currently leading product development at SkyVerge Labs; MS in Computer Science from George Mason University

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3

Backend: Node.js, Express.js, Spring Boot, REST APIs, Microservices, JWT Authentication, Event-Driven Architecture

Frontend: React.js, Redux, Tailwind CSS, Material UI, HTML5, CSS3, REST API Integration, Responsive Design

Mobile Development: Android (Java, Android SDK, JDK), MVC/MVVM Architecture, Google Play Services, REST API Integration

Databases: MongoDB, PostgreSQL, MySQL, Redis, Mongoose ODM, SQL query optimization

Cloud & DevOps: AWS (EC2, S3, Lambda, Glue, RDS, CloudWatch), Docker, GitHub Actions, GitLab CI/CD, Nginx, Linux, Git, Jira

AI / ML: LLM Integration (OpenAI API, Claude API), Prompt Engineering, AI-powered automation, ETL Pipelines, Data Modeling

Testing: Jest, Mocha, Postman, Swagger, Unit Testing, Integration Testing, BDD

Other: System Design, Microservices Architecture, Performance Optimization, Code Review, Technical Mentorship, Agile/Scrum, Remote Collaboration

WORK EXPERIENCE

Software Engineer

RS Technologies Inc.

March 2026 – Present

Technology services firm | SaaS platform | Node.js / Java backend

- Engineered scalable backend services and REST APIs using Node.js, Express.js, and Java/Spring Boot for a SaaS platform, automating workflows that process millions of records daily via scheduled AWS Lambda and Glue jobs
- Boosted system throughput by ~30% through query optimization, async processing refactors, and Dockerized deployments; set up GitHub Actions CI/CD pipelines reducing release cycle time significantly
- Built React.js internal dashboards for real-time system health monitoring and validation failure tracking; led code reviews and mentored 2 junior engineers on clean code practices and API design
- Partnered with product and QA teams in Agile sprints to define API contracts, ship features on schedule, and maintain 99%+ uptime across production services in a fully remote environment

Software Developer

I Giants Inc.

July 2024 – Jan 2026

Software product company | Full-stack SaaS development | MERN stack

- Developed and shipped full-stack MERN application features (MongoDB, Express.js, React.js, Node.js) and Java/Spring Boot services, supporting a SaaS platform serving 500K+ users
- Reduced API response times by 40% through service layer refactoring, query indexing, and caching strategies using Redis and MongoDB aggregation pipelines
- Architected and optimized PostgreSQL and MongoDB schemas with indexing strategies, cutting query execution time by 35% for high-volume data workloads
- Delivered features end-to-end across the stack in 2-week Agile sprints using Git/GitLab branching workflows, contributing to a 20% faster release cadence

Team Lead (Android & Backend)

OSOS Pvt Ltd.

March 2023 – May 2024

Mobile & backend product company | Android + Node.js | Hyderabad, India

- Led a team of 4 engineers building Android and Node.js/Spring Boot backend systems, scaling the platform from 1K to 100K+ active users through modular microservices architecture
- Built and integrated RESTful Node.js backend APIs with mobile clients, implementing JWT-based authentication and real-time push notifications via Google Play Services
- Set up Docker-based deployment pipelines and managed AWS EC2/S3 infrastructure, achieving consistent staging-to-production releases with zero downtime

- Mentored team members on design patterns and best practices, ensuring timely feature releases and measurable system improvements across sprints

ENTREPRENEURSHIP & PROJECTS

Founder & CEO — SkyVerge Labs Co.	<i>Sep 2025 – Present</i>
• Founded SkyVerge Labs, building AI-powered SaaS products using MERN stack and LLM integrations (OpenAI API) to automate business workflows for SMB clients • Architected cloud-native infrastructure on AWS (EC2, S3, Lambda) with Docker and CI/CD pipelines, managing full product lifecycle from design to production deployment • Designed modular Node.js/Express.js microservices with MongoDB, enabling independent scaling and fast feature iteration across multiple SaaS product lines • Integrated AI features using prompt engineering and LLM APIs to build intelligent automation tools, reducing manual client workflows by 60%	

Kitchen Stock — Inventory Management System

- Built a full-stack MERN inventory management platform with React.js frontend, Node.js/Express.js backend, and MongoDB, automating raw material tracking and cost calculations for restaurant businesses
- Designed SKU-based architecture with multi-level dependencies (BOM system)
- Implemented dynamic unit conversion engine, supporting oz, kg, packs, and gallons

API Documentation Tool Typescript, Node.JS	<i>Sep 2023 – Dec 2023</i>
• Automated the generation of PDF or TXT documents for all API endpoints in Node.js projects, saving time and improving efficiency for developers. • Designed an interface within VS Code, simplifying the navigation and documentation of Node.js APIs for development teams. • Enhanced productivity by streamlining the API documentation process, ensuring accuracy and ease of use.	

EDUCATION

George Mason University	Fairfax, VA, USA
<i>Master of Science in Computer Science</i>	<i>May 2024</i>
Guru Nanak Institute of Technology	Hyderabad, TS, INDIA
<i>Bachelors in Computer Science and Engineering</i>	<i>Aug 2022.</i>

CERTIFICATIONS

MERN Stack Fundamentals by Great Learning	MAY 2024
AWS Certified Solutions Architect - Associate	DEC 2024
